

Skedulo for Field Services

INDUSTRY LEADERS USE SKEDULO

SUNRUN

Optimize Schedules

Field services companies have needed to digitally transform based on increased customer expectations and competitive pressure. Leveraging route planning optimization software for automated scheduling is a critical step towards this transformation.

Skedulo's purpose-built scheduling and route optimization solution helps you better manage and engage your deskless workers and customers.

You can configure Skedulo to automatically optimize the schedules of your workers or manually update. With Skedulo's optimization engine, you are able to minimize worker travel and drive time through travel time estimates based on historical traffic information.

Optimized schedules reduce serious employee engagement and retention hurdles; employees feel more autonomous, flexible, productive and happy in their roles — resulting in more motivated, happier teams and fewer open roles.
